Why are there 2 different Site IDs? CES should only have one, correct?

Doretha,

Please initiate two SCORPIOS reports for the CES Environmental Services, Inc.- Houston site (Site). Both reports should cover all Site related costs beginning from the Site's inception and ending January 30, 2016.

1. The SSID # for the first of the two SCORPIOS reports is A6JP.
2. The SSID # for the second of the two SCORPIOS reports is A6KC.

Site attorney needs these reports prior to arranging for negotiations with the Site's PRPs.

Site OSC will review the SCORPIOS reports and thereafter inform the Site attorney if:

1. All billings from contractor(s) and/or their subcontractors for their performed removal work at the Site are identified on the two SCORPIOS reports, and
2. The OSC/EPA has reason to believe contractor(s) and/or their subcontractors have justification to send additional billings to EPA for removal work already identified on the two SCORPIOS reports,

Bob
